To view these resources, you will need a Discovery Education Espresso subscription.

Preview of pupil steps:

1. What plants do you eat? And what PARTS of a plant do they come from? Let's find out more!
2. Read or listen to this factfile about the different parts of the plant. Different parts have different jobs. Why is each job important?
3. Test your knowledge by doing this labelling activity.
4. Complete this sheet with the names of the different parts of the plant. Can you remember what each part does? Why not add that to the sheet too?
5. Have a look outside. Fill in this sheet with what the different parts of these plants look like.
6. Watch this video to find out which parts of different plants we eat. Which of these do you like to eat?
7. Which part of the plant do these different foods come from? Can you sort them into the right boxes?
8. What did you have for lunch or dinner? Which types of food on your plate came from plants? What part of the plant?

What are home learning routes? Help children learn from home with these ready-made routes through Discovery Education Espresso content. The routes include video, text and glossaries for learning, as well as art, design and creative writing challenges for children to apply and demonstrate what they know.
