

Engage

What is under our feet?

We will learn about the layers of the earth, what causes earthquakes and volcanoes and where to find them.

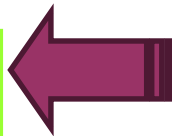

Year 3 – Spring 1

Rocks, relics and rumbles.

We will be creating our own model volcanoes.

Express

The children will learn about:

English:

- We will be reading some traditional fairy tales and working on our character and setting descriptions to help us re-write the story in a different way.
- We will be researching facts and writing reports.
- We will be learning about different types of poetry and poetic devices.

Maths:

- * Multiplication and division
- * Money
- * Statistics

Science:

- Learning about different types of rocks and fossils and how they are formed.
- Different types of soil

Geography

We will be finding out about the layers of the earth and the position of the tectonic plates. We will learn about volcanoes and earthquakes and the city of Pompeii.

We will use map skills to locate different countries and volcanoes, including latitude and longitude and eight points of the compass.

Art & DT:

- * Using papier-mache and paints to design, make and evaluate our own volcanoes.

Other areas of learning:

RE: What is the Trinity and why is it important to Christians?

Music: Charanga: Three little birds unit.

PSHE: Dreams and Goals

PE: Yoga and Joe Wicks Fitness.

Computing: We are presenters.
